Objective

Aspiring software developer with hands-on experience in frontend technologies, including React.js, HTML, CSS, and JavaScript. Seeking to leverage strong problem-solving skills and a solid foundation in software development to contribute to a dynamic development team.

Experience

RINEX TECHNOLOGIES Pvt Ltd.

Software support Executive — Oct 2024 - Dec 2024

Provided timely and effective software support to over 100 clients, contributing to a 20% increase in customer satisfaction ratings.
Collaborated with cross-functional teams to design and implement a new software support process, reducing average resolution time by 30%.
Trained and mentored new support executives, leading to a 40% improvement in first-call resolution rates.

Damatrix solution Pvt Ltd. — May 2025 - July 2025

React Developer Intern
Internship Experience

Developed and maintained responsive user interfaces using React.js, JavaScript, and Tailwind CSS.
Worked on building reusable components, handling API integration, and managing application state using Redux.
Collaborated with senior developers to debug issues and implement UI enhancements.
Participated in daily standups, sprint planning, and code reviews as part of an Agile development team.
Gained hands-on experience in Form validation (Formik/Yup), React Router, and localStorage for data persistence.
Built a CRUD application with authentication and localStorage integration, improving user experience and data reliability.

Bankura Unnayani Institute of Engineering (BUIE) — 2024

B.TECH in Computer Science & Engineering
Aggregate -8.19

Skills

Programming Languages: HTML, CSS ,JavaScript.

Frontend Development: React.js, Tailwind CSS

Core Concepts: Object-Oriented Programming (OOPS)

Backend Technologies: Node.js Basic understanding

Tools & Technologies: Git, GitHub, npm, REST APIs , Vercel, Render, VS Code

AI: Claude, ChatGPT

Projects

CRUD APPLICATION

Built a File Converter web application using React that allows users to upload one or multiple files, choose the required output format, and download the converted files easily. The application includes **drag-and-drop file upload**, smooth file handling, and clear conversion status using loading indicators and error messages. The main focus was to create a **simple, user-friendly interface** and ensure proper communication between the frontend and backend for reliable file conversion.

TechStack: ReactJS,JavaScript,HTML,TailwindCSS, FetchAPI,Vite Backend: Node.js, Express.js(server) LiveDemo: https://converter-files-wheat.vercel.app/

File Converter Web Application

A CRUD application built with the MERN stack (MongoDB, Express, React, Node.js) enables users to perform Create, Read, Update, and Delete operations on data. MongoDB serves as the database, storing and managing data. Node.js powers the backend, handling server-side logic and API requests. React provides the frontend user interface for interacting with the data. Angular, although less common in this combination, can be used as an alternative frontend framework to create a dynamic and responsive user experience. The stack provides a full JavaScript-based solution for building scalable and efficient web applications.

User Authentication System (Login & Signup)

Developed a Login and Signup system that allows users to create an account and log in securely. The project handles user registration, login checks, and basic authentication, with proper form validation and clear error messages. The main goal was to understand how user authentication works, how data is handled safely, and how the frontend communicates with the backend.

Certificates

MERN Stack Development Course
EJOB India ---
Description: A comprehensive training program focused on full-stack web development using MongoDB, Express.js, React.js, and Node.js. Gained hands-on experience in building scalable, dynamic web applications.
